# SureGrasp™

SureGrasp™ Suture Passer Offers Precise Control and Safety for Port Site Closure

Our advanced SureGrasp Suture Passer features long, retractable grasping fingers that easily and safely capture sutures during laparoscopic and other surgical procedures. When the grasping fingers are closed, the SureGrasp tip seals to quickly and safely pass suture. Both of our Carter-Thomason Systems feature the new SureGrasp technology, which helps ensure:

- Complete closure of fascia and peritoneum
- Pneumoperitoneum is maintained
- System works under direct visualization
- Reproducibility through easy-to-learn techniques
- Precise closure for a range of surgical procedures, including hernia repair

CARTER-THOMASON® SG
with *SureGrasp*™ Technology

CARTER-THOMASON® II
Port Closure System
with *SureGrasp*™ Technology

SureGrasp Fingers Opened

Extendable and blunt grasping fingers facilitate suture capture
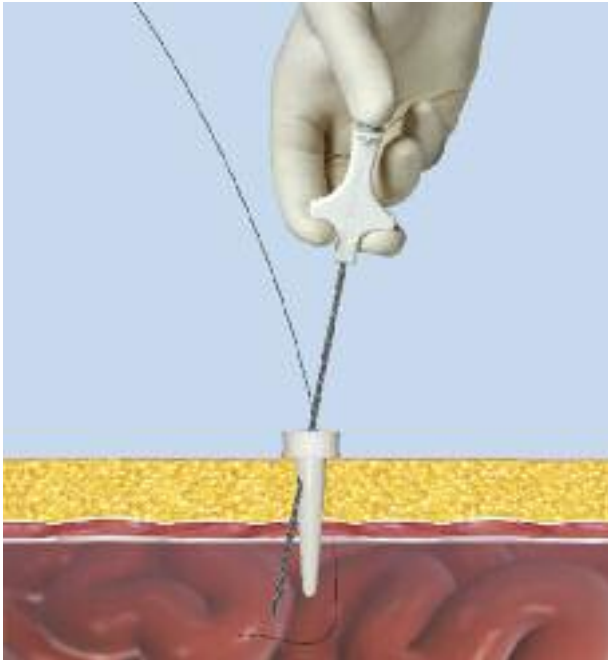

SureGrasp Fingers Closed

Retractable grasping fingers seal the needle tip to prevent tissue coring
